## ON-SITE SEMINAR INFORMATION

The MIL-STD-1553 SEMINAR is designed to provide a solid base for interpreting and understanding the requirements of MIL-STD-1553. The Seminar presents a thorough discussion of MIL-STD-1553 and testing. Problem areas in the standard are clarified and available options are examined. Lab sessions are provided to give participants "hands-on" experience in working with MIL-STD-1553 communication. Both experienced 1553 engineers and novices to 1553 have found the Seminar to be valuable.

For seminars taught on-site, the host is expected to provide a meeting room, projector and screen and a public address system. We have found that the best setting for the Seminar is a classroom arrangement with tables for the students to spread out their materials and tables in the back of the room for the equipment for the lab stations for the lab sessions.

The 1553 Seminar is presented in either a 2 day format or a 3 day format. The 3 day format provides more time for the students to assimilate the material and allows some time in the afternoons for other responsibilities. The minimum fee for the Seminar, plus transportation for the instructor, covers up to twelve (12) students. The fee for additional students is per person. These fees cover all expenses: travel, materials, and instruction.

A two and a half hour MIL-STD-1773 SEMINAR (the fiber optic version of 1553) is available to be taught on an evening during the 1553 Seminar or on a day prior to or following the 1553 Seminar. The MIL-STD-1773 SEMINAR provides a discussion of the requirements of MIL-STD-1773 and the problem areas associated with fiber optic transmission. The minimum fee for the 1773 Seminar covers up to twelve (12) students. The fee for additional students is per person.

A three hour Overview of MIL-STD-1553 is available either prior to or following the 1553 Seminar. The Overview of MIL-STD-1553 is intended to provide the basics of MIL-STD-1553 to engineering managers. The minimum fee for the Overview of MIL-STD-1553 covers up to twelve (12) students. The fee for additional students is per person.
